

GRAPHIACHECK ASSESSMENT REPORT

Student: **Ishika Agarwal**

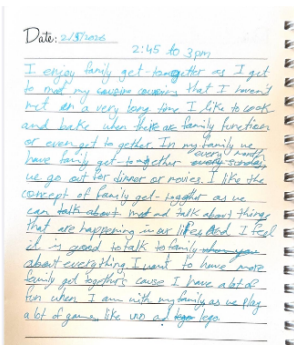

School: **Podar International, Mumbai**

Grade: **Grade 11** | Age: **16Y 2M 29D**

Date: **11/06/2026**

Uploaded By: MSL | familledifile@gmail.com | 8767048973

ORIGINAL HANDWRITING SAMPLE

TIMING RECORD

DURATION

15 minutes

TOTAL WORDS

125 words

WRITING SPEED

8 WPM

(Grade 11 norm: 20-30 WPM)

Prompt: My Family

Paper Type: Lined / Ruled

Time Limit: 15 minutes

Instrument: Ballpoint Pen

Note: Words in bold = spelling errors. Strikethrough = student cancellations.

VERBATIM OCR TRANSCRIPTION

"Date: 2/5/2026 2:45 to 3pm I enjoy family **get-togetther** as I get to meet my ~~{CANCELLED: cousins}~~ cousins that I haven't met in a very long time. I like to cook and bake when **theire** are family **function** or even get to gether. In my family we every month have family **get-togethir** ~~{CANCELLED: every sunday}~~ we go out for dinner or movies. I like the concept of family **get-togghter** as we can talk about meet **ad** talk about things that are happening in our **lifes**. And I feel it is good to talk to family ~~{CANCELLED: when you}~~ about every thing. I want to have more family get **togethir's** cause I have **alot** of fun when I am with my family as we play a lot of **game** like uno **ad** ~~{CANCELLED: board game}~~."

DOMAIN SCORES

SENTENCE BOUND.	GRAMMAR	PAST TENSE	SPELLING	FLUENCY	FORMATION	ALIGNMENT
70	50	60	30	8	65	75
AVERAGE	NEEDS SUPPORT	NEEDS SUPPORT	NEEDS SUPPORT	NEEDS SUPPORT	NEEDS SUPPORT	AVERAGE

RECOMMENDATION

A formal evaluation is NOT recommended at this time because the student has shown positive improvement with current interventions.

PROBABILITY

High probability based on DSM-5 traits (spelling 2+ levels below, slow fluency, poor spacing), but mitigated by positive response to current interventions.

BASAL LEVEL

Consistent use of basic end punctuation, capitalization at sentence beginnings, and spelling of simple sight words.

CEILING LEVEL

Breakdown occurs with multisyllabic spelling, application of morphological rules (plurals), and maintaining grade-appropriate writing speed.

WRITTEN LANGUAGE SKILLS DIAGNOSTIC

DOMAIN & INDICATORS	SCORE	CLINICAL COMMENTS
Sentence Boundaries Capitals, punctuation, periods	70	Understands basic capitalization and end punctuation but tends to create long, run-on phrases.
Grammar Structure, agreement, syntax	50	Struggles with grammatical agreement and misses plural markers; uses simplistic syntax.
Past Tense Usage Regular and irregular past verbs	60	Functional use of basic past tense, though the sample is primarily written in the present tense.

ACADEMIC DISCREPANCY ANALYSIS

The sample is at least two grade levels below expectations in spelling, fluency, grammar, and ideation.

SPELLING PATTERNS & GRADE LEVEL DISCREPANCIES

gettogether	→ get-together (approximate grade level: 3rd grade)	theire	→ there (approximate grade level: 3rd grade)
function	→ functions (approximate grade level: 3rd grade)	to gether	→ together (approximate grade level: 2nd grade)
gettogethir	→ get-together (approximate grade level: 3rd grade)	gettogghter	→ get-together (approximate grade level: 3rd grade)

HANDWRITING MECHANICS & GEOMETRIC ELEMENTS

- **Letter Formation:** Inconsistent geometric construction; some letters are poorly closed or rushed.
- **Alignment:** Mostly stays on the ruled lines with a relatively stable baseline.
- **Spatial Organisation:** Adequate vertical spacing, utilizing the ruled lines effectively to prevent overlap.
- **Writing Speed:** Slow/Labored
- **Horizontal Spatial:** Fluctuating spaces between words and occasional improper spacing within words.
- **Vertical Spatial:** Adequate vertical spacing, utilizing the ruled lines effectively to prevent overlap.
- **Line Quality:** Labored with varying pen pressure and multiple self-corrections/cross-outs.
- **Line Formation:** Inconsistent geometric construction; some letters are poorly closed or rushed.

FLUENCY ANALYSIS (WORDS PER MINUTE)

125 WORDS TOTAL PRODUCED	15 MINUTES DURATION	8 WPM STUDENT SPEED	20-30 WPM GRADE 11 NORM
---	--	--	--

125 words / 15 minutes = 8.33 WPM. The physical act of writing is taking up so much mental energy that cognitive load is heavily disrupted.
Qualitative assessment: **Slow/Labored.**

CLINICAL INTERPRETATION & NEXT STEPS

ASSESSMENT RECOMMENDATION A formal evaluation is NOT recommended at this time because the student has shown positive improvement with current interventions.
PROBABILITY ESTIMATE: HIGH High probability based on DSM-5 traits (spelling 2+ levels below, slow fluency, poor spacing), but mitigated by positive response to current interventions.

ACTIONABLE STRATEGIES

- While the student displays clear features associated with written expression difficulties, we must look at their recent history. Because the student has recently received targeted interventions and has shown positive improvement (Response to Intervention), I DO NOT recommend a formal psycho-educational evaluation at this time. The fact that they are improving means the current support system is working. We should continue to monitor their progress and provide accommodations rather than pulling them out for stressful testing.
- Based purely on the visual evidence and DSM-5 criteria, there is a High probability that a formal assessment would identify traits of Dysgraphia or a Specific Learning Disability in Written Expression. This is due to the slow writing speed (8 WPM), poor letter formation, inconsistent spacing, and spelling errors that are at least two grade levels below Grade 11 expectations. However, because the student is responding well to their current interventions, we will focus on continuing that positive momentum.

ACTIONABLE STRATEGIES (CONTINUED)

- Encourage the use of typing or speech-to-text software for longer assignments. This removes the physical barrier of handwriting, allowing the student's true intelligence and ideas to shine through.
- Provide extra time for all written tasks, as it takes them much longer to process and produce written words.
- Use graphic organizers to help the student plan their thoughts before they begin writing, which reduces the cognitive load during the actual writing process.
- Focus on editing in stages. Have the student write their ideas first without worrying about spelling, and then do a separate review purely to check for spelling and punctuation errors.
